

Line Number	Error	Error Type	Error Correction
8	Missing semicolon after variable declaration	Syntax Error	int x = 10;
13	Assignment operator ('=') used in condition instead of comparison operator ('==')	Logical Error	if(x == 10){ }
18	String literal assigned to an integer variable	Type Mismatch	int marks = 90;
20	Variable 'z' used without declaration	Semantic Error	Declare 'z' : int z = 100;
22	Attempt to assign a value to a constant literal	Syntax Error	x = 100;
26	Array index out of bounds ('arr[10]' for an array of size 5)	Runtime Error	Use a valid index between '0' and '4', e.g., 'arr[4] = 50;'
28	Address of integer variable assigned to 'float *' pointer	Type Mismatch	int *ptr = &x;
30	Incorrect format specifier '%f' used for integer variable 'x'	Format Error	printf("%d\n", x);
35	Division by zero ('b' is 0)	Runtime Error	Ensure 'b' is not zero before division
37	Multi-character constant assigned to 'char' variable	Type Mismatch	Use a single character like 'char ch = 'A';'
42	Incorrect message printed in 'else' block	Logical Error	printf("Y is greater");
46	Call to undefined function 'show()'	Semantic Error	Declare and define 'show()' before calling it
48	Extra semicolon after 'while' loop creates an empty loop	Logical Error	Remove the semicolon: 'while(x < 15)'
53	'continue' statement used outside a loop	Syntax Error	Place 'continue' inside a loop or remove it
55	'break' statement used outside a loop or switch	Syntax Error	Place 'break' inside a loop/switch or remove it
57	Function 'calculate()' called with one argument instead of two	Semantic Error	Call 'calculate(10, value);' with both required arguments
