

Line Number	Error	Error Type	Error Correction
13	Missing semicolon after int choice = 1	Syntax Error	int choice = 1;
15	Assigning string to int: int marks = "90";	Type Error	int marks = 90;
22	Function add called with one argument	Function Call Error	result = add(a, b);
26	Assignment used in condition if(a = b)	Logical Error	if(a == b)
31	Undeclared variable score	Compile-Time Error	Declare score or use correct variable name
35	Array index out of bounds arr[10]	Runtime Error	Use valid index 0-4
37	Negative array index arr[-1]	Runtime Error	Use valid non-negative index
41	Buffer overflow in strcpy	Runtime Error	Increase buffer size or use strncpy
47	Assigning string literal to array variable	Compile-Time Error	strcpy(city, "Delhi");
55	Comparing strings with ==	Logical Error	Use strcmp(user, "admin")==0
63	Division by zero	Runtime Error	Ensure denominator is non-zero
67	Dereferencing NULL pointer	Runtime Error	Allocate memory or validate pointer
71	Using uninitialized pointer	Runtime Error	Initialize pointer before dereference
81	Use after free	Runtime Error	Do not access memory after free
83	Double free	Runtime Error	Free memory only once
87	Insufficient memory allocation	Runtime Error	Allocate 10*sizeof(int)
98	Memory leak (lost first allocation)	Resource Leak	free memory before reassigning
102	average called with two arguments	Function Call Error	average(70,80,<third value>)
121	Prime logic incorrect	Logical Error	Set isPrime = 0 when divisible
133	Undefined function calculateSalary()	Linker Error	Declare and define function
147	Missing colon after case 1	Syntax Error	case 1:
158	Multi-character constant 'AB'	Type Error	char grade = 'A';
167	Array index out of bounds scores[3]	Runtime Error	Use indices 0-2
171	Loop condition accesses scores[3]	Runtime Error	for(i=0;i<3;i++)
182	Wrong formula for area	Logical Error	area = 3.14 * radius * radius;
186	Stray semicolon after while	Logical Error	while(choice > 0)
191	continue outside loop	Syntax Error	Remove or place inside loop
205	average returns integer division	Logical Error	return (a+b+c)/3.0;
