

Line Number	Error	Error Type	Error Correction
8	Assigning string to int age	Type Error	int age = 20;
14	Assigning string literal to char	Type Error	char grade = 'A';
16	Wrong format specifier for salary	Format Error	printf("%f\n", salary);
18	Wrong format specifier for marks	Format Error	printf("%d\n", marks);
22	Undeclared variable score	Identifier Error	Declare score or replace with valid variable
25	Redeclaration of x	Declaration Error	Remove second declaration
27	Assignment to constant	Syntax Error	x = 100;
31	Wrong format specifier for num	Format Error	printf("%d\n", num);
35	Wrong format specifier for pi	Format Error	printf("%f\n", pi);
39	Float used as array index	Array Error	arr[2] = 100;
45	Too few arguments to add()	Function Call Error	add(10,20);
53	Too few arguments to average()	Function Call Error	average(10,20,30);
57	Assigning string to int temperature	Type Error	int temperature = 35;
61	Assigning string to float discount	Type Error	float discount = 10.5;
67	Assigning string to array name	Array Error	strcpy(name,"Robil");
72	Undeclared variable totalMarks	Identifier Error	Declare totalMarks
81	Wrong format specifier for rate	Format Error	printf("%f\n", rate);
89	Undeclared variable c	Identifier Error	Declare c or call add(a,b)
101	Assignment in if condition	Logical Error	if(studentMarks == 100)
106	Assigning string to int size	Type Error	Use enum/int value
111	Wrong format specifier for percentage	Format Error	printf("%f\n", percentage);
115	String used as array index	Array Error	arr2[5] = 100;
123	String literal in case label	Switch Error	case 2:
129	Undefined function multiply()	Function Error	Define multiply()
139	Wrong format specifier for areaRect	Format Error	printf("%f\n", areaRect);
148	Lossy assignment of float return to int avgMarks	Type Error	float avgMarks;
154	Undeclared variable value	Identifier Error	Declare value
156	Assigning string to int employeeId	Type Error	char employeeId[]="EMP101";
