

Line Number	Error	Error Type	Error Correction
11	Division by zero	Runtime Error	Check divisor before division
15	NULL pointer dereference	Runtime Error	Allocate memory before dereferencing
19	Array index out of bounds	Runtime Error	Use valid index 0-4
23	Uninitialized pointer dereference	Runtime Error	Initialize pointer before use
29	Buffer overflow with strcpy	Runtime Error	Increase array size or use strncpy
35	Dereferencing uninitialized pointer	Runtime Error	Allocate/initialize ptr3
41	File pointer not checked for NULL	Runtime Error	Check fopen result before fscanf
47	Heap buffer overflow	Runtime Error	Allocate sufficient memory
53	Use after free	Runtime Error	Do not access memory after free
59	Double free	Runtime Error	Free memory only once
65	Modulo by zero	Runtime Error	Check divisor before modulo
71	Buffer overflow with strcat	Runtime Error	Ensure destination buffer is large enough
79	Heap array out of bounds	Runtime Error	Limit loop to allocated size
87	2D array out of bounds	Runtime Error	Use valid matrix indices
91	NULL pointer access	Runtime Error	Check pointer before access
95	Unsafe gets()	Runtime Error	Use fgets()
105	Use after free	Runtime Error	Do not write after free
109	Use of uninitialized variable age	Runtime Error	Initialize age before printing
113	Negative array index	Runtime Error	Use index within bounds
117	Dereferencing uninitialized pointer	Runtime Error	Initialize ptr8
125	NULL string passed to printf %s	Runtime Error	Validate pointer before printing
133	malloc result not checked	Runtime Error	Check hugeArray != NULL
141	Infinite loop / pointer overflow	Logical Runtime Error	Add termination condition
