

| Line Number | Error                                | Error Type    | Error Correction                          |
|-------------|--------------------------------------|---------------|-------------------------------------------|
| 12          | Odd/even logic reversed              | Logical Error | Even when $\text{num} \% 2 == 0$          |
| 22          | Grades A and B swapped               | Logical Error | 90+ should be Grade A                     |
| 37          | Incomplete leap year logic           | Logical Error | Check century rules                       |
| 47          | Voting eligibility reversed          | Logical Error | 18+ should be eligible                    |
| 57          | Smaller number logic incorrect       | Logical Error | Print b when $a > b$ else a               |
| 71          | Largest number algorithm uses <      | Logical Error | Use > comparisons                         |
| 85          | Integer division in average          | Logical Error | Cast to float before division             |
| 95          | Circle area formula incorrect        | Logical Error | Use $\pi * r * r$                         |
| 107         | Bonus percentage likely incorrect    | Logical Error | Use intended bonus rate                   |
| 117         | Month names shifted by one           | Logical Error | Map 1=January, 4=April                    |
| 141         | Prime logic incorrect                | Logical Error | Set isPrime=0 when divisible              |
| 157         | Discount added instead of subtracted | Logical Error | $\text{purchaseAmount} - \text{discount}$ |
| 169         | Sum loop overwrites value            | Logical Error | $\text{sum} += i$                         |
| 179         | Temperature condition reversed       | Logical Error | 35 should not be cold                     |
| 189         | Grade interpretation reversed        | Logical Error | A should be excellent                     |
| 201         | Rectangle area formula incorrect     | Logical Error | $\text{length} * \text{width}$            |
| 209         | Pass/fail logic reversed             | Logical Error | 75 should pass                            |
