

Line Number	Identifier	Error Type	Error	Error Correction
3	Global Variable (total)			
5	Function Prototype (update)			
6	Function Prototype (display)			
10	Variable (marks)	Semantic Error	String assigned to int	int marks = 90;
16	Function Call (printf)	Syntax Error	Missing semicolon after printf statement	printf("Program Started\n");
32	Function Call (add)			
39	Variable (number)	Semantic Error	Address of register variable accessed	Remove '&number' or use non-register variable
41	Variable (salary)	Semantic Error	String assigned to int	static int salary = 50000;
48	Variable (department)	Scope Error	Used outside block scope	Declare outside block
55	Variable (temp)	Scope Error	Used outside loop scope	Declare before loop
57	Array (arr[5])			
59	Array Access	Runtime Error	Index 10 out of bounds	Use index 0-4
63	Expression	Runtime Error	Division by zero	Ensure b != 0
67	Conditional	Logical Error	Assignment used instead of comparison	if(value == 100)
74	Conditional	Logical Error	Both branches print same message	Change else branch
83	Function Call (display)			
85	Function Call (update)			
87	Variable (grade)	Semantic Error	String assigned to char	char grade='A';
107	Variable (data)	Runtime Error	Uninitialized variable used	Initialize before use
111	Pointer (ptr)	Runtime Error	NULL pointer dereference	Assign valid address
120	Function Call (calculateAverage)	Linker Error	Function not declared/defined	Declare and define function
124	Variable (employeeId)	Semantic Error	String assigned to int	Use char employeeId[]="EMP101";
127	Loop (while)	Logical Error	Extra semicolon creates infinite loop	Remove semicolon
